Tilted pure stationary state
Diagonal stationary state
(a)
(b)
(c)
(d)
t_c
Input $|0\rangle$
Input $|1\rangle$
Population $P(0|j;t)/\varepsilon_\star$
Trace distance D_{tr}
Population distance D_{pop}
Distance / $\varepsilon_\star$
$D_{\mathrm{pop}}(t_c) = 0$
Time t/t_{r}
